PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, Pandas, Excel, Power BI, Power Query, DAX, Snowflake, ETL, EDA, data cleaning, transformation, data modeling, KPI analysis, and data visualization. Experienced in developing end-to-end analytics solutions and interactive dashboards that transform raw data into actionable business insights.

TECHNICAL SKILLS

Data Analytics: SQL, Python, Pandas, Excel, ETL, EDA, Data Cleaning, Data Transformation, Data Validation, Trend Analysis
Business Intelligence: Power BI, DAX, Power Query, Data Modeling, Dashboard Development, Data Visualization, KPI Analysis, Business Intelligence
Databases: Snowflake, MySQL

INTERNSHIP EXPERIENCE

REALWEB

Python Programming Intern

Remote
September 2025 – November 2025

- Completed a three-month internship involving Python programming, data processing, debugging, problem-solving, and data validation.
- Applied Python to technical tasks, tested outputs, investigated errors, and validated results against requirements.

PROJECTS

Global Sales and Supply Chain Analytics

Python, Pandas, SQL, Snowflake, Power BI, Excel

GitHub: github.com/EmmanuelThomas2004/Global-Sales-Supply-Chain-Analytics

- Analyzed 180,519 transaction records covering sales, profitability, customers, markets, shipping, and supply chain performance.
- Developed an end-to-end workflow from Python data cleaning and Snowflake warehousing to SQL analysis and Power BI dashboards.
- Created five interactive dashboards and generated insights into profitability, customer performance, delivery, and supply chain operations.

Healthcare Analytics Intelligence

Python, Pandas, SQL, MySQL, Snowflake, Power BI, DAX

GitHub: github.com/EmmanuelThomas2004/Healthcare-Analytics-Intelligence

- Analyzed 597,774 healthcare records across patients, admissions, billing, diagnoses, and hospitals.
- Performed data profiling, cleaning, validation, transformation, and exploratory analysis using Excel, Python, and Pandas.
- Built MySQL and Snowflake data layers and developed five Power BI dashboards covering patients, operations, financials, clinical journeys, and hospital performance.

AI-Powered Autonomous Surface Cleaning Robot (MossClean)

AI-Assisted Development: Prompt Engineering, Computer Vision, AI Model Training

GitHub: github.com/EmmanuelThomas2004/MossClean

- Developed an autonomous surface-cleaning robot integrating moss detection, navigation, obstacle avoidance, targeted cleaning, and web-based monitoring.
- Collected and prepared image data for moss detection and integrated computer vision with the robotic control system.
- Developed software and web components using prompt engineering and AI-assisted development.

EDUCATION

St. Joseph's College of Engineering and Technology, Palai

Bachelor of Technology in Electronics and Computer Engineering

2026

CGPA: 7.06

St. Mary's Higher Secondary School, Bharananganam

Class XII: 88%

Alphonsa Residential School

Class X: 78%

CERTIFICATIONS

SQL Certification, HackerRank | Introduction to Data Analytics, Simplilearn | Python Programming Internship Certificate, REALWEB | NPTEL Cloud Computing
